WORK EXPERIENCE

Software Engineer | 06/2024 - Present

Internet Thailand Public Company Limited (INET)

- Contributed to multiple government and healthcare platforms, covering identity, API, contract, and verification systems across large-scale projects.
- Implemented core features including admin dashboards, user and contract management, authentication, digital signatures, and automated testing across frontend and backend.

Software Engineer (Freelance) | 10/2025 - 12/2025

Tong A Travel Company Limited

- Designed and implemented backend APIs for a multi-role travel booking and referral platform, supporting admin, partner, driver, and tourist workflows including booking, referral, payout, and withdrawal.
- Built core systems for partner place management, accounting and tax processing, payment integrations, and deployed the platform with monitoring and background job processing.

Software Engineer Intern | 04/2023 - 06/2023

SKY ICT Public Company Limited (SKY ICT)

- Developed and improved the AOT CMS as a Full-Stack Developer with a focus on performance and microservices architecture, and conducted automated testing for the Plan B Media CMS to ensure system reliability.

EDUCATION

Prince of Songkla University, Hatyai Campus | 2020 - 2024

Bachelor of Engineering in Computer Engineering

SKILLS

Programming

- HTML, CSS, Javascript, Typescript, Python, Go, C

Framework/Library

- React/Next, Vue/Nuxt, Flask, Angular, Express/Hono, Fiber/GORM

Database

- MongoDB, MySQL, PostgreSQL

Other

- Docker, Gitlab CI/CD, Jest, Robot Framework, Playwright, Figma

Software Engineer

PERSONAL INFORMATION

Full name:	Nattapol Singhad
Email:	nattapol.dev@gmail.com
Telephone number:	095-068-0262
Address:	Hatyai Songkhla Thailand
Nationality:	Thai
Gender:	Male

EDUCATION

Prince of Songkla University Hatyai campus (2020 - 2024)
Bachelor of Engineering in Computer Engineering

TECHNICAL PROFICIENCY

Programming:	HTML, CSS, JavaScript, TypeScript, Python, Go, C
Framework/Library:	React/Next, Vue/Nuxt, Flask, Angular, Express/Hono, Fiber/GORM
Database:	MongoDB, MySQL, PostgreSQL
Cloud/Hosting:	DigitalOcean, AWS, Cloudflare, Render, Vercel
Other:	Docker, Gitlab CI/CD, Jest, Robot Framework, Playwright, Figma

NATTAPOL SINGHAD
Software Engineer

Internet Thailand Public Company Limited (INET)
Software Engineer
(Jun 2024 – Present)

- Project: Provider ID
  - Designed and implemented multiple web applications for medical personnel identification, patient health record (PHR) management and census information.
  - Developed key functionalities, including admin dashboards, admin management, digital signature integration using digital certificates and implemented the OAuth 2.0 system for the Provider ID.
- Project: Moph API Mx
  - Designed and enhanced an API request management platform used for Health ID and Provider ID services.
  - Built administrative dashboards, error monitoring, document handling and system configuration features across frontend and backend.
  - Improved system usability and branding, including UI refinements and platform assets.
- Project: Education Admin Portal Platform
  - Designed and structured the Education Admin Portal for managing organizations, personnel, news, services, and workspaces within the Education Super App ecosystem.
  - Designed and implemented Role-Based Access Control (RBAC) with roles and permissions to manage user access and control feature availability across the system.
- Project: Driver Verify
  - Developed a driver identity verification platform with registration and profile management workflows.
  - Implemented OTP-based authentication and improved password recovery and consent management features.
  - Enhanced overall user experience and security for the verification process.
- Project: E-Contract
  - Developed a digital contract management system supporting both B2B and B2C workflows.
  - Implemented user profile management, contract tracking, and digital signature features.
  - Built interfaces for contract status monitoring and system usage information.

NATTAPOL SINGHAD
Software Engineer

Tong A Travel Company Limited
Software Engineer (Freelance)
(Oct 2025 – Dec 2025)

- Project: Tong A Travel – Online Travel Booking & Referral Platform
  - Designed and implemented backend APIs for a travel booking and referral platform supporting four roles: admin, partner, driver, and tourist.
  - Built core systems including booking management, partner place management, referral tracking, payouts, and driver withdrawals.
  - Implemented accounting features such as revenue summaries, withholding tax calculations, and automated receipt generation.
  - Integrated multiple payment methods including Stripe, PromptPay, Google Pay, Apple Pay, and credit/debit cards.
  - Deployed the system on DigitalOcean App Platform with monitoring via Sentry, background jobs using Cloudflare Workers, and domain management through Cloudflare.

Go Digit Company Limited
Software Engineer (Freelance)
(Apr 26, 2025 – Apr 28, 2025)

- Project: ETDA E-Commerce Product Data Scraping POC
  - Designed and developed a Proof of Concept (POC) system for collecting and displaying e-commerce product data from Shopee and Lazada.
  - Built a full-stack web application using Next.js, React, TypeScript, Node.js and Express.js.
  - Implemented web scraping and API-based data extraction workflows to retrieve product listings, category hierarchies and product discovery data from e-commerce platforms.
  - Developed RESTful APIs to coordinate scraping processes, process collected data and deliver structured results to the frontend.
  - Implemented data processing and transformation logic to normalize raw product data into structured formats for presentation and further analysis.
  - Designed the system architecture with separate frontend, backend API and scraping service layers to improve maintainability and support future expansion to additional e-commerce platforms.

Software Engineer

DETAILED PROJECT EXPERIENCE

SKY ICT Public Company Limited
Full Stack Web developer (Internship)
(Apr 2023 – Jun 2023)

- Project: AOT CMS portal
  - Develop Front-end using ReactJS, NextJS.
  - Develop Web Service (Microservice) using ExpressJS, GraphQL, gRPC, Protobuf.
  - Project: Sawasdee Translate
  - Develop Front-end using ReactJS.
  - Conducted comprehensive unit testing using Jest for code functionality and enhanced code quality.
  - Project: PLANB CMS
  - Automated testing processes using Robot Framework.

Prince of Songkla University
Student (Senior Project)
(Nov 2022 – Mar 2024)

- Project: Network Monitoring System for Prince of Songkla University
  - Develop Web service and Web application using Flask.
  - Designed and implemented a web application displaying PSU network equipment and their statuses on an interactive map.
  - Developed a dashboard to display SLA metrics on a quarterly basis, enhancing visibility into host and service performance.
  - Integrated with the Checkmk server via REST API for real-time monitoring and data retrieval.
  - Automated testing processes using the Robot Framework.
